INSTALLATION *Instructions*
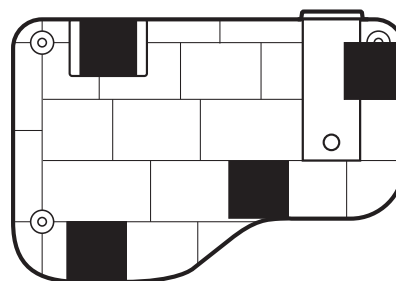

1 Use provided double-sided super tape for a quick and convenient installation. **Neatfold should be placed in an area large enough to accommodate a bed sheet stretched to length.**

2 Remove adhesive lining from each side of tape and apply one tab to each of the 4 flat surfaces on backside of Neatfold. Then stick Neatfold evenly onto a clean, dry and vertical surface approximately 5 feet from the floor. Then cover screw holes with the provided white caps.

☞ **NOTE:** The provided tape is **permanent**. Please measure properly before placement.

INSTANT

Supplies Needed:

WOOD SURFACES

1 Hold Neatfold level to the wall approximately 5' from the floor. Mark a location of each of the three holes with a pencil.

2 Drill a 1/8" size hole for each mark.

3 Again, hold Neatfold to the wall, insert the provided screws into their respective holes and then secure using a standard Phillips-head screwdriver.

4 Cover screw holes with provided white caps.

DRYWALL OR PLASTER SURFACES*

1 Hold Neatfold level to the wall approximately 5' from the floor. Mark a location of each of the three holes with a pencil.

2 Drill a 3/16" size hole for each mark.

3 Gently tap the provided anchors into their respective holes using a hammer.

4 Again, hold Neatfold to the wall, insert the provided screws into their respective holes and then secure using a standard Phillips-head screwdriver.

**5** Cover screw holes with provided white caps.
